

## JAMES MAXWELL PRINGLE

Ocean Process Analysis Laboratory  
Institute for the Study of Earth, Oceans, and Space (EOS)  
University of New Hampshire  
142 Morse Hall  
39 College Road  
Durham, NH 03824-3525

Phone: (603) 862-5000  
Fax: (603) 862-0243  
E-mail: [jpringle@unh.edu](mailto:jpringle@unh.edu)  
Web: <http://oxbow.sr.unh.edu>

### EDUCATION

1998-2000	Postdoctoral fellow, Physical and Biological Oceanography Scripps Institute of Oceanography
1998	Ph. D. in Physical Oceanography MIT/WHOI
1990	B.S. in Physics with High Honors Dartmouth College

### PROFESSIONAL EXPERIENCE

2007-present	Associate Professor Department of Earth Sciences, University of New Hampshire Associate Director, Ocean Process Analysis Laboratory in EOS
2001-2007	Assistant Professor Department of Earth Sciences, University of New Hampshire
1990-1992	Scientific Programmer on ocean GCM projects Naval Research Laboratory, Code 7330 Worked with John Kindle, Harley Hurlburt, and J. Dana Thompson

### Publications

#### *Manuscripts & Submissions (email Pringle for preprints):*

- Pringle J.M., J.E. Byers, M. Fernández, P. Pappalardo, J.P. Wares. Before the flood; climate change, ocean currents and sudden range shifts in coastal marine species with planktonic dispersal. In Prep, Nature, Spring 2014.
- Pappalardo P., J.M. Pringle, J.E. Byers, J.P. Wares. Dissecting marine biogeographic breaks in the coastal ocean to detect the factors that affect the leakiness of barriers to dispersal. In Review, Proceedings of National Academy of Sciences, Spring 2014.
- Byers, J.E., R. Smith, M. Bishop, J.M. Pringle, E. Johnson, G. Ruiz, G. Inglis, C. Hewitt. Not done invading--environmental and temporal controls on the geographic extent of non-native marine species. In Prep, Ecology Letters, Spring 2014.
- Storch, L.M, J.M. Pringle. Chaos, Periodicity, and Everything in Between: Revisiting the Logistic Map with An Ecologically Realistic Spatial Structure and Dispersal Mechanism. In Prep, Journal of Mathematical Biology, Spring 2014.

Ewars C. J.M. Pringle, J.E. Byers, A.H. Sepúlveda, J.P. Wares, Biogeography is Not Neutral: Case Study of a Chilean Intertidal Barnacle (*Notochthamalus scabrosus*), In Prep, Evolution, Spring 2014.

## **EXTERNAL FUNDING**

- Collaborative Research: A mechanistic understanding of biogeographic patterns and life histories in benthic organisms in advective coastal environments. \$232,108 to J. Pringle. 06/2010 to 05/2013. Source: National Science Foundation, Biological Oceanography.
- Collaborative Research: Evaluating Marine Clines to Predict Larval Retention. \$72,981 to J. Pringle. 09/2010 to 08/2013. Source: National Science Foundation, Biological Oceanography.
- Invasive Species Trouble Spots: Tracking the Spread of European Green Crabs in the Gulf of Maine from Upstream Retention Zones. \$21,397 to J. Pringle and J. Byers 07/2007 to 06/2008. Source: Sloan Foundation.
- Collaborative Research: The Interaction of Estuarine Circulation with Wind-Driven Shelf Circulation. \$190,591 to Pringle. 07/01/05-06/30/09. Source: National Science Foundation, Physical Oceanography.
- Co-OP/WEST Wind Driven Circulation Near Pt. Reyes.  
Includes purchase of 12 processor Linux cluster. Essentially a two-year project, but funding compressed into one year.  
Subcontract from SIO \$56,625 to Pringle. 05/01/05-06/30/06.  
Source: National Science Foundation/CoOP.
- GLOBEC-01: Zooplankton Population Dynamics on Georges Bank: Model and Data Synthesis. \$337,391 to Pringle. 5/2002-4/2006. Source: National Science Foundation, Biological Oceanography.

Proposal to Augment the UNH Center of Excellence in Coastal Ocean Observation and Analysis (COOA) \$221,888 to Pringle (funding for: 2 month summer salary, two years of student support, and two years of a postdoc). 8/2003 to 8/2007 as a series of one-year awards.  
Source: National Oceanographic and Atmospheric Administration.

Globec III: Studies of Plankton and Larval Fish  
\$9,419 to Pringle, 1/2001-12/2001.  
Source: National Oceanographic and Atmospheric Administration/GLOBEC.

### ***MEETING SESSIONS CHAIR OR CONVENED***

2006 Ocean Sciences Meeting: Convening ``OS045: Biological, Biogeochemical, and Physical Dynamics and Their Interactions in the Coastal Ocean" with Kipp Shearman, Niki Gruber, Jess Adkins and Heidi Sosik.

2005 US Globec Georges Bank Target Species Meeting, Durham, NH.

2004 Fall AGU session: Chaired ``Shelf Processes" oral session and several poster sessions.

2003 Mid-Atlantic Bight Physical Oceanography Conference: Session chair for ``Wind-driven dynamics and modeling" session.

### ***INVITED COMMITTEES AND REVIEW PANELS***

Fall 2012: NSF Physical Oceanography proposal review panel.

Summer 2006: Coastal Response Research Committee proposal review panel.

Summer 2005: NSF Physical Oceanography proposal review panel.

Summer 2004: NSF Science and Technology Center proposal review panel.

Summer 2004: Georges Bank GLOBEC meeting, Newport Rhode Island.

Fall 2003: Maine Sea Grant proposal evaluation panel, Cambridge, Ma.

Fall 2003: Northeast Observing System Regional Meeting, Durham, NH.

Summer 2003: Georges Bank GLOBEC GBSyns synthesis project P.I.'s meeting. I organized the meeting. Durham, NH.

Fall 2002: NSF planning panel for a program of study of the Interconnectedness of Marine Populations, Durango CO. Report in EOS Transactions, 2003.

Spring 2002: Coastal Ocean Processes and Observatories: Advancing Coastal Research, Savannah GA.  
Report at <http://www.skio.peachnet.edu/research/coop/publica.php>

Spring 2001: Gulf of Maine Ocean Observing System planning meeting, Woods Hole Massachusetts.

### ***MANUSCRIPT AND PROPOSAL REVIEWS***

Review for: Journal of Geophysical Research, Ocean Modeling, Continental Shelf Research, Journal of Physical Oceanography, Limnology and Oceanography, Deep Sea Research, Journal of Plankton Research, Geophysical Research Letters, Marine Ecology Progress Series, Journal of Coastal Research, Ecology Modeling, Ocean Modeling, Oceanography.

Proposals: National Science Foundation, NOAA, ECOHAB, Maine Sea Grant. NH Sea Grant, US Civilian Research & Development Foundation.

## **LECTURE CLASSES**

### **Introduction to Oceanography**

A freshman level general education course covering all aspects of oceanography. Includes a lab.

### **Introduction to Climate**

A sophomore/junior level course for Earth Science, Natural Resources, and Oceanography majors. Covers the dynamics of climate change on timescales of 10Myrs, 100Kyr, and decade scale change.

### **Introduction to Physical Oceanography**

An introductory graduate level course on physical oceanography. Covers general circulation, coastal circulation and wave dynamics. Assumes college calculus, but no prior exposure to partial differential equations. Students are exposed to quasi-balanced results, understand in which parameter range they are valid, but do not derive them as expansions of the equations of motion in a small parameter.

### **Geophysical Fluid Dynamics**

Geophysical Fluid Dynamics taught at an advanced graduate level. Fluid dynamics of the atmosphere and oceans on rapidly rotating and stratified planets. Focus on large scale circulation of the ocean, circulation and coastal topography, and the links between wave motions and quasi-balanced approximations. Pre-requisite of fluid dynamics and PDE's.

### **Quantitative Methods for the Earth Sciences**

Statistical, computational and mathematical tools required for the Earth Sciences. Basic statistics and error analysis, programming in MATLAB, numerical methods. Pre-requisite of calculus and physics. Includes a lab.

## **COLLABORATORS**

Peter Franks, Lew Incze, Nicholas Wolff, Erika McPhee-Shaw, Jeffrey Runge, Changsheng Chen, Edward Durbin, Wendy Gentleman, Jay Austin, Arnaldo Valle-Levinson, Ann Bucklin, Jeannette Yen, Andrew Pershing, Donald Webster, Peter Winsor, Andone Lavery, John Wares, Jeb Byers, Fei Chai, Andrew Cooper, Michael Lesser, Andy Rosenberg, Larry Ward, Ray Grizzle, Ru Morrison, Erik Sotka, Allan Strand, Clive Dorman, Darko Koracin, Huijie Xue, Larry Mayer, Molly Lutcavage, Janet Campbell, Lucy Smedstad, Joe Roman, April Blakeslee, Andres Sepulveda, Sergio Navarrete.

## **STUDENTS AND POSTDOCTORAL FELLOWS**

*Graduate Students Advised:* Ginger McMullin, Jennifer Brassard, Stephen Brodovicz, Michael Bates, Shivanesh Rao, Michael Christenson (Earth Science/Oceanography) and Laura Storch (Applied Math).

*Postdoctoral Scholars:* Catherine Johnson, Whitley Saumweber and Martin Huret.

*Summer Research Fellow:* David Houseman, Emily Glick and Annie Cervin
